

Ovenware II®

Stronger than plastic. More versatile than paper. Easier to handle than aluminum. Go from the freezer to the oven to the table without bubbling, sagging or melting.

- Custom-molded, three dimensional solution.
- Extreme performance from -40°F to 400°F.
- Cool to the touch after heating.
- Strong enough for heavier entrees.
- High quality, premium image.
- Ready-to-serve without transferring food.

Rim printing	•			
Tray strength	•	•	•	
Premium visual appearance	•	•		
Tray strength when hot	•			

Huhtamaki

Our ambition is to become the first choice in sustainable packaging solutions

Our sustainability ambitions focus on two key topics: transitioning to a circular economy and taking climate action, whilst not forgetting other environmental and social aspects of sustainability.

For us, sustainability means considering our impact – both positive and negative – throughout the entire value chain, in terms of the environment, social responsibility as well as business ethics and governance and pro-actively working on becoming a leader in all three sustainability pillars by minimizing the negative impacts of our operations and products on the environment while maximizing the positive impacts on our stakeholders, consumers, and society.

Production

Turning virgin wood pulp into a usable packaging material requires massive amounts of energy, water and natural resources. By using reclaimed and recycled post-industrial materials, We reduce the environmental impact and turn materials destined for the landfill into a remarkable, sustainable tray.

- Ovenware II is composed of **95%** reclaimed post-industrial fiber and is laminated.
- Lower energy consumption than virgin fiber products.
- Water-based inks used in printing.

Transportation

- Lighter weight and uniform nesting lowers per-unit transportation costs.

Ovenware II[®] does it all!

Ovenware II may just be. . . the best tray ever produced.

- Suitable for the microwave and conventional ovens up to 400°F (205°C).
- Won't crack or become brittle down to -40°F (-40°C).
- Stays rigid hot or cold.
- Custom-molded, three-dimensional solutions in many shapes and sizes.
- Can be film lidded.
- Premium visual appeal ready to serve.

One compartment or more

Custom mold into nearly any size, shape and configuration. Up to 12" x 12" and 3" deep (300mm x 300mm x 75mm) with any number of compartments.

Strong enough for the heaviest foods

Single compartment design and Ovenware II strength are perfect for ready-to-eat foods like lasagna dinners and cinnamon rolls.

Full coverage

Tint the fibers. Tint the film. Tinting the fibers and/or film delivers a vibrant appearance.
