Corona Update Flexible Packaging Europe

Dear Business partner,

We all find ourselves in a new world with skyrocketing new Covid-cases and restrictions that affect our every day lives.

For us as a company it is important that our employees are safe and healthy, but also that all our operation are running smoothly.

As we have already implemented various hygiene measurements in spring there is no need to make major changes, however we have increased the awareness of the current situation in all our factories to ensure that these measurements are taken seriously.

Only Huhtamaki employees on site

At the moment we try to keep non-employees at a minimum. That means that for example physical audits are postponed or done online and all visitors are only allowed if it is business critical. Of course social distancing rules apply and wearing face masks is mandatory on the entire premises. All our employees were provided with the new Huhta Mask - the reusable face mask, fluid repellent, anti-microbial and designed with comfort in mind. (Read more: [huhtamask.com](https://www.huhtamask.com))

Preventive measures are in place to secure our production and the offices

We disinfect our production halls in Ronsberg, Tortona and Prague with an external provider on a regular basis. This means once a week in Ronsberg and Tortona and fortnightly in Prague.

In addition, the increased cleaning intervals of frequently touched surfaces are still in place. All our staff are required to wear face masks.

We still continue to have online meetings instead of face-to-face meetings. If a meeting is held live, maximum occupancy rules per office and meeting rooms are in place.

Remote working -
the preferred
choice at the
moment

We have offered staff to work from home if possible until the second wave in Europe shows significant signs of reducing. If people need to be on site - we split teams into shifts so that even if someone gets infected it is limited to a single shift and our operations can continue.

Of course the most important for us is that our customers are served in the best possible way in these difficult times.

Supply safety is
our number one
goal

We currently try to build the right buffers in raw material to ensure supply safety for all our customers. It is the most important to us that our, but of course also your production can continue to produce without any delays or complications. Please be aware that we have 2 month left in 2020 so please get in touch with us if you have any special needs during the holiday season.

We are aware that this situation is challenging to all of us and we want to make sure everything works as smoothly as normal. So if you have any additional questions please do not hesitate to contact us. We will be happy to support.

Stay healthy!

Your
Huhtamaki Team
