Experience sustainability in everything we do.

Give your customers extra reasons to love your brand, with a packaging range that loves the planet. With our sustainable product range, you can responsibly package your delectable food and beverages, bolstering your brand's sustainable reputation.

Sustainability is an integral part of our functions that combine environmental protection, social justice and economic efficiency. By combining our packaging expertise and our renewable, recyclable and compostable material base, we can meet a wide range of requirements for environmentally optimal packaging.

We take every opportunity to be at the forefront of technology, materials research and new product development. Our sustainable product launches offer added value for our customers and society. We specialize in sustainable, forestry-certified fiber-based packaging with little or no plastic content and PFAS-free materials.

SUSTAINABILITY GLOBAL AMBITION 2030

100%

Products designed to be recyclable, compostable and reusable.

>80%

Renewable raw material or recyclable.

100%

Recycled fiber or fiber from certified sources.

>90%

Wastes non-hazardous recycled or composted.

100%

Renewable electricity.

Carbon neutral production

Scientifically regulated emissions target.

Explanations of symbols and terms

Sustainable sourcing:

Raw materials sourced from sustainably managed PEFC certified forests. Proud to support sustainable sourcing and the principles of the EU Timber Regulation No 995/2010.

All of our paperboard products are made with PEFC certified paper board (PEFC 02-31-385). Wooden cutlery from FSC-certified, sustainably managed forests (FSC paperboard can be used on request).

Industrially compostable:

These products can be composted in an industrial composting facility, which is a place where the perfect balance of heat, moisture, and oxygen is created to break down organic and plant-based materials.

Home compostable:

These products can be placed in a home compost bin where they will decompose naturally within a period of time into the soil.

Recyclable:

These products can be reprocessed and the material used to manufacture new products.

Renewable:

Made from natural resources which replenish to overcome resource depletion caused by usage and consumption, either through biological reproduction or other naturally recurring processes.

Plastic raw materials and their shortcuts:

- PS Polystyrene
- PE Polyethylene
- PLA Polylactide (biodegradable) plastic

Plastic free:

These products do not contain any plastic.

No intentionally added PFAS:

Our packaging offers advanced grease resistance without intentionally added PFAS.

Leadtimes and availability:

All our products in this brochure should be available within a regular leadtime, but can vary depending on the product. Products which have the **MTO** label next to them are "made to order" so the MOQ (minimum order quantity) can be higher and leadtime can be longer.

Your local partner,
with global experience.

Our cups are produced and used locally
which reduces emissions from freight.

As part of the Huhtamaki Group, we are able to meet all of our customers' needs, thanks to our more than 114 production plants in 37 countries around the world. At Huhtamaki, we are global specialists in food and beverage packaging and we are dedicated to ensuring that every consumer's experience is enjoyable, consistent and safe. We understand packaging as more than what surrounds a product.

We help building brands, protect reputations and open up new opportunities in new markets. That's why we're always close by, working as long-term partners with our clients, accompanying them as they evolve and grow. Wherever we are, we adapt and offer packaging that meets local demands. We work efficiently and with respect for the world around us, demonstrating our values on a daily basis, manufacturing quality products and providing reliable service. Whether your customers are drinking at home, at work or on the go, our hot cups and lids are right - wherever they are enjoyed. We have the best cups for you to serve your most delicious hot drink. With a variety of matching lids for on-the-go, including our new fiber lids as an alternative to plastic, you're all set.

Our cup product portfolio is manufactured in Europe - following European environmental, health and safety standards. This reduces not only emissions from freight, but ensures also security of supply.

Hot cups

Shall we have a coffee?

CUPS, LIDS & ACCESSORIES

From freshly brewed coffee to creamy hot chocolate, we have the right products for you. Whether your customers are drinking at home, at work or on the go, our hot cups and lids are the right packaging for your products, wherever they are enjoyed.

We have the best cups for you to serve your most delicious hot drink. You will find the right sizes for your needs in our range. From espresso to tall lattes, we have the perfect cup. You can even have the mugs printed with your own design.

Our single-walled cups are best suited for everyday use. If you want more insulation or shine, take a look at our double-walled cups. For customers who want a coffee or other hot drink to go or delivered to their home, our double-walled cups offer an optimal S-corrugated design for improved insulation; no separate sleeve is required. This saves cost and space and reduces the number of SKUs. Most importantly, they have 25% less material compared to competitors' smooth-walled and triple-walled tumblers.

With a variety of matching lids for on-the-go, including our new fiber lids as an alternative to plastic, you're all set. Whether you're serving in a restaurant, takeaway or delivery service, we have the perfect solution.

Paper hot cups

Our premium single wall hot cups are available in a variety of standard designs, in plain white, or custom printed with your own design.
Single wall cups are suitable for all hot drinks and are fully recyclable, made with PEFC certified paper board (PEFC 02-31-385).

Our cups are produced and used locally which reduces emissions from freight.

Future Smart™ Woodland hot cups

- Reducing the environmental footprint: Our woodland cups use less plastic than standard coated board and acrylic based aqueous dispersion coatings, which are considered to be plastic. We achieve a minimum of 95% fiber content by product weight, or less than 5% polymer content.
- 100% renewable plant based lining (made from vegetable oils), no fossile based materials (they contain no carbon content older than 100 years as verified by the 14C carbon dating method).
- Highly pulpable and recyclable via existing paper waste-streams. Made with PEFC certified paper board (PEFC 02-31-385).

Double wall hot cups

Our double wall hot cups come with a bubbly outer or smooth wall that helps to keep the drink warm for longer. They are ideal for long-lasting coffee enjoyment and make hot beverages pure joy to take along. The insulation ensures improved grip, comfort and safety.

Future Smart™ Wooden Stirrer

- The plastic-free Future Smart™ wooden stirrers are made of renewable materials. The natural birch wood used in the production is from sustainably managed FSC-certified forests.
- By choosing a wooden cutlery you help reduce plastic consumption and waste, communicate environmentally friendly values and support the global need to reduce the impact of packaging on our environment.
- Our wooden stirrers have been designed for optimal performance in automatic dispensing machines. Their shape makes them easy to replace in the machine and reinforces your commitment to sustainability, as they are made from 100% plastic-free material.

Cold Cups

Beat the heat -
refresh yourself.

COOL DOWN WITH STYLE

Shakes, smoothies, iced coffee mixes and cold drinks are served in style with our wide range of clear plastic cups and lids for cold drinks. We produce a wide range of clear plastic cups for cold drinks in PET/ RPET, PLA, PP and PS. Our cups and lids are available in different sizes and shapes. Clear lids with high clarity add to the convenience when carrying the drink around.

Our cold drink cups are available in a range of attractive designs or can be customised with your own design or logo. Combined with the cold cup lids, you can enjoy cold drinks on the go.

INNOVATIVE PACKAGING

Made from rPET, a material derived from recycled PET bottles, they are recyclable, offer excellent clarity and are also crack-resistant.

BioWare™ cold drink cups and the matching lids offer the same handling functionality as products made from traditional plastic. Due to the natural material properties, the cups are suitable for use up to 40° C. Our cups have natural origin, as they are made from renewable resources and fulfil all requirements in terms of functionality, appearance and hygiene.

With our BioWare™ range, we are pioneers in the field of compostable packaging. The BioWare™ cold drinks cup was the first of its kind. BioWare™ cups are made from the renewable Ingeo-PLA material, which is fully compostable in industrial composting facilities.

Our products are used by the world's leading foodservice and beverage brands and are recognised for their quality and ease of use.

- Made from 100% plant-based, renewable raw materials.
- Our packaged, recyclable paper straws are an excellent option for sustainable accessories and a hygienic drinks service.
- Recyclable (where facilities exist)
- High quality, reliable & functional.
- Our molded fiber carriers are made from recycled material and are stackable even with limited storage space. They are also home compostable.

Compostable

Food Containers

Served in style.

FOOD CONTAINERS AND TRAYS

Daily routines and consumer behaviours have changed, particularly the ordering, collection or delivery and consumption of meals and drinks. This has led to the introduction of new and evolving service models.

Packaging is instrumental in delivering the latest menus, drinks and treats to consumers. The functionality of the packaging is vital to enable excellent service as well as maintaining the all important quality of the food within.

Our versatile kraft, fiber-based food boxes and trays are perfect for hot and cold meals or snacks. For serve over, hot cabinet, takeaway and delivery use. Our widespread material base and manufacturing capabilities means our range comprises different fiber based solutions.

Fiber based packaging communicates sustainable values.

Taste Lite containers deliver high performance with **less than 5% plastic**, using **recyclable, re-pulpable materials**. They are durable, **leak-resistant**, and maintain food temperature, **suitable for reheating**, microwaving, ovens, hot cabinets, and freezing. The improved **Microflute design reduces condensation**, while the rPET window enhances visibility. Fast to pack, easy to stack, and designed for efficiency, they help ensure consistent portions and reduce waste.

Kraft paper Microwave Container

Microwave-safe kraft containers provide a reliable, convenient packaging solution for fast-paced foodservice operations. Designed for hot and cold meals alike, they allow food to be packed, stored and reheated directly in the container—maintaining quality from kitchen to customer. With a robust, leak-resistant design, hot-cabinet compatibility and a simplified range of three sizes with one universal lid, they support efficient takeaway, delivery and ready-to-reheat meal concepts.

- FSC Certified Kraft paperboard. Recyclable.
- Durable **kraft paperboard** with **PP lining** ensures sturdy structure, **leak resistance** and moisture protection
- Universal lid fits both container sizes, streamlining operations and inventory: **RPET lid** for an attractive display and over-the-counter sales - **PP lid** for reliable delivery and safe microwave use.

Fiber dishware

New version of Bioware™

Fiber plates have a reduced stacking height (which results in a significant higher efficiency in storage, logistics and handling).

With the Solenis barrier, the products have an enhanced grease resistant performance. They are designed for packing of hot and cold (up to 60°C), moist and fatty food for short period of times. The plates are made from bagasse, 100% plastic free and made without any intentionally added PFAS. They are certified home compostable.
