Shall we have a coffee?

CUPS, LIDS & ACCESSORIES

From freshly brewed coffee to creamy hot chocolate, we have the right products for you. Whether your customers are drinking at home, at work or on the go, our hot cups and lids are the right packaging for your products, wherever they are enjoyed.

We have the best cups for you to serve your most delicious hot drink. You will find the right sizes for your needs in our range. From espresso to tall lattes, we have the perfect cup. You can even have the mugs printed with your own design.

Our single-walled cups are best suited for everyday use. If you want more insulation or shine, take a look at our double-walled cups. For customers who want a coffee or other hot drink to go or delivered to their home, our double-walled cups offer an optimal S-corrugated design for improved insulation; no separate sleeve is required. This saves cost and space and reduces the number of SKUs. Most importantly, they have 25% less material compared to competitors' smooth-walled and triple-walled tumblers.

With a variety of matching lids for on-the-go, including our new fiber lids as an alternative to plastic, you're all set. Whether you're serving in a restaurant, takeaway or delivery service, we have the perfect solution.

Single wall paper hot cups

Our premium single wall hot cups combine style, functionality, and sustainability. Available in a range of standard designs, plain white or custom printed, they are ideal for all hot drinks in cafés, restaurants, delivery services, and on the go.
Made with PEFC-certified paperboard (PEFC 02-31-385), these recyclable cups offer a reliable, leak-proof solution when paired with a secure lid.

REASONS YOU'LL LOVE IT

Our cups are produced and used locally which reduces emissions from freight.

NEW DESIGN COMING SOON*

Made from plantbased, renewable raw materials: Inner coating made from PLA, fully industrially compostable and certified in accordance with DIN EN 13432.
Free from genetically modified substances.
Industrially compostable and recyclable (where facilities exist).
Made with PEFC certified paper board (PEFC 02-31-385).

Creatively customised - Stand out packaging with personalised printed cups.

Custom printed cup is an important messaging tool, to not only support your brand, but to communicate product, promotional and sustainability messaging, right into the hand of consumers - a product that your customers will be happy to take with them.

- Highly experienced **in-house design team** to support our customers with their artworks.
- High-quality all-over printing in **all standard sizes** on a **big range of materials** - from regular boards to plat-based and compostable boards.

Produced at our own manufacturing site, made to order from just 1000 pcs - ready in just 15 working days.

Reducing the environmental footprint: Our woodland cups use less plastic than standard coated board and acrylic based aqueous dispersion coatings, which are considered to be plastic. We achieve a minimum of 95% fiber content by product weight, or less than 5% polymer content.

Renewable plant based lining (made from vegetable oils), no fossile based materials (they contain no carbon content older than 100 years as verified by the 14C carbon dating method).

Highly pulpable and recyclable via existing paper waste-streams.
Made with PEFC certified paper board (PEFC 02-31-385).

Double wall paper hot cups

Our double wall hot cups come with a bubbly outer or smooth wall that helps to keep the drink warm for longer. They are ideal for long-lasting coffee enjoyment and make hot beverages pure joy to take along. The insulation ensures improved grip, comfort and safety.
Made with PEFC-certified paperboard (PEFC 02-31-385).

Our rPS Cup is an ideal choice for the circular economy. Designed to already meet the 2030 PPWR requirements, they feature a lightweight design, reduced stacking height, and 10% mechanically recycled post-consumer PS in the middle layer. Available as a standard 180 ml cup, with additional sizes on request, they offer a practical and future-ready solution for vending applications.

- The plastic-free wooden stirrers are made of renewable materials. The natural birch wood used in the production is from sustainably managed FSC-certified forests.
- By choosing a wooden cutlery you help reduce plastic consumption and waste, communicate environmentally friendly values and support the global need to reduce the impact of packaging on our environment.
- Our wooden stirrers have been designed for optimal performance in automatic dispensing machines. Their shape makes them easy to replace in the machine and reinforces your commitment to sustainability, as they are made from plastic-free material.

Cold Cups

Beat the heat - refresh yourself.

COOL DOWN WITH STYLE

Shakes, smoothies, iced coffee mixes and cold drinks are served in style with our wide range of clear plastic cups and lids for cold drinks. We produce a wide range of clear plastic cups for cold drinks in PET/RPET, PLA and PS. Our cups and lids are available in different sizes and shapes. Clear lids with high clarity add to the convenience when carrying the drink around.
Our cold drink cups are available in a range of attractive designs or can be customised with your own design or logo. Combined with the cold cup lids, you can enjoy cold drinks on the go.

INNOVATIVE PACKAGING

Made from rPET, a material derived from recycled PET bottles, they are recyclable, offer excellent clarity and are also crack-resistant.

BioWare™ cold drink cups and the matching lids offer the same handling functionality as products made from traditional plastic. Due to the natural material properties, the cups are suitable for use up to 40° C. Our cups have natural origin, as they are made from renewable resources and fulfil all requirements in terms of functionality, appearance and hygiene.
With our BioWare™ range, we are pioneers in the field of compostable packaging. The BioWare™ cold drinks cup was the first of its kind. BioWare™cups are made from the renewable Ingeo-PLA material, which is fully compostable in industrial composting facilities.

Our products are used by the world's leading foodservice and beverage brands and are recognised for their quality and ease of use.

Choose our PLA plastic cups as an industrially compostable alternative that performs like traditional plastic. PLA cold drink cups and matching lids are crystal clear, shatterproof, and ideal for packaging cold food and beverages.
Made from renewable plant-based materials (PLA from maize starch), they combine sustainability with high standards of functionality, appearance, and hygiene—perfect for drinks up to 40°C.

Accessories

- Made from plant-based, renewable raw materials.
- Our packaged, recyclable **paper straws** are an excellent option for sustainable accessories and a hygienic drinks service.
- Recyclable (where facilities exist)
- High quality, reliable & functional.
- Our molded **fiber carriers** are made from recycled material, are stackable even with limited storage space.
  They are also home compostable.

Food Containers

Served in style.

FOOD CONTAINERS AND TRAYS

Daily routines and consumer behaviours have changed, particularly the ordering, collection or delivery and consumption of meals and drinks. This has led to the introduction of new and evolving service models.

Packaging is instrumental in delivering the latest menus, drinks and treats to consumers. The functionality of the packaging is vital to enable excellent service as well as maintaining the all important quality of the food within.

Our versatile kraft, fiber-based food boxes and trays are perfect for hot and cold meals or snacks. For serve over, hot cabinet, takeaway and delivery use. Our widespread material base and manufacturing capabilities means our range comprises different fiber based solutions.

Taste Lite containers deliver high performance with **less than 5% plastic**, using **recyclable, re-pulpable materials**. They are durable, **leak-resistant**, and maintain food temperature, **suitable for reheating**, microwaving, ovens, hot cabinets, and freezing. The improved **Microflute design reduces condensation**, while the rPET window enhances visibility. Fast to pack, easy to stack, and designed for efficiency, they help ensure consistent portions and reduce waste.

MTO

Award winning taste range with Morro™ plastic-free coating

Our Morro™ - coated boxes feature a **natural, non-chemically modified plant polymer coating** ideal for hot food and delivery. They offer **excellent grease and leak resistance**, meet demand for plastic-free solutions, and are **not subject to SUPD restrictions** while optimising EPR fees. UK-made from responsibly sourced paper, they also support full 5-colour co-branding.

Customized packaging for Ice Cream & Snacks.

Present ice cream, soups, and snacks with packaging that matches the highest quality standards—perfect for ice cream shops, cafés, events, or takeaway concepts. Our premium food cups are made from PEFC certified paperboard and are available with traditional or plant-based linings, making them suitable for both frozen and hot treats. High-quality in-house flexo printing with water-based inks means every brand looks vibrant and stands out.

-> Interested in expanding your selection or offering your clients something new? Contact us for more information and a quote on your custom-printed ice cream and snack packaging!

Kraft paper range

- Microwave-safe Kraft containers are a practical solution for takeaway, delivery and ready-to-reheat meals. Made from FSC-certified, recyclable kraft paperboard with a PP lining, they are durable, leak-resistant and suitable for hot and cold foods.
- Three container sizes and a universal lid simplify operations, while RPET and PP lid options support both display sales and microwave-safe delivery.

- Sturdy yet light design - These fiber dishware products are made from bagasse fibers from sustainably managed sources) and are plastic free. Bagasse is classified as one of the world's fastest renewable and recycable raw materials.
- With the Solenis barrier, the products are grease resistant and suitable for use up to 60°C. These products are not intended for long time storage nor for heating foodstuff in a conventional oven or microwave.
- They are also made without any intentionally added PFAS.

Our new version of Fiber plates have a reduced stacking height (which results in a significant higher efficiancy in storage, logistics and handling).
With the **Solenis barrier**, the products have an enhanced grease resistant performance. They are designed for packing of hot and cold (up to 60°C), moist and fatty food for short period of times. The plates are made from bagasse, plastic free and made without any intentionally added PFAS. They are certified home compostable.

Fiber snack trays

- Made from renewable, plant-based bagasse fibers, this range offers a sustainable alternative to conventional food packaging and replaces commonly used PS and EPS takeaway solutions.
- Lightweight yet sturdy, the products deliver excellent functionality while being plastic-free, made without intentionally added PFAS and certified home compostable.

Fiber meal boxes

- Made from renewable bagasse fibers sourced from sustainably managed resources, our fiber meal boxes are a plastic-free and environmentally friendly alternative to traditional PS and EPS takeaway packaging. Lightweight yet sturdy, they are ideal for hot and cold meals, snacks, takeaway, street food and over-the-counter service.
- Made without any intentionally added PFAS, they are certified home compostable and deliver reliable performance with a natural, premium look.

Wooden Cutlery

Crafted from wood sourced from sustainably managed FSC-certified forests, our wooden cutlery offers a durable, stylish and environmentally friendly alternative to conventional disposable utensils. With a smooth, splinter-free finish and robust design, it ensures a comfortable dining experience while being easy to handle.

Ideal for restaurants, delivery services and on-the-go dining, this high-quality and functional range combines convenience with sustainability. Made from renewable materials and recyclable where facilities exist, it is a responsible choice for businesses looking to reduce their environmental impact without compromising on performance.
