

Paperboard cups and containers for dairy, spreads, and dips

A proven, high-quality alternative to plastic that combines shelf-life performance, premium graphics, and domestic manufacturing capabilities without sacrificing reliability.

Huhtamaki

A proven paper-based alternative to plastic

Our comprehensive range of containers and lids designed for cultured dairy and spreads is manufactured to ensure the highest standards of food safety and shelf life. Offered in sizes of 5-32 fluid ounces, our paperboard solutions have been trusted for more than a decade to deliver reliable performance for refrigerated products.

Differentiate your product with a paper-based container designed for shelf impact and brand visibility.

Key Benefits for Producers

- 1 Edge protection technology provides barrier protection to maintain product freshness and shelf life.
- 2 High-definition lithographic printed cups eliminate the need for secondary labels, enhancing shelf presence and product presentation.
- 3 Domestic production on select sizes with continued investment of US manufacturing footprint.
- 4 The flat rim cup design provides a wide surface for strong, consistent lid sealing.
- 5 Paperboard lids with high-impact lithographic printing are available for multi-serve container reclosure.
- 6 Optional printing on container bottom.
- 7 Paper-based containers provide a sustainable alternative to advance plastic-reduction goals.
- 8 Potential to enable savings in states with EPR fees.

Key Benefits for End-Consumers

- 1 Paper-based packaging is perceived as better for the environment and aligns well with plant-based, organic, and healthy products.¹
- 2 High-quality printing produces vivid, attention-grabbing graphics that help consumers quickly locate your product and clearly read ingredient information.

Quality packaging, responsibly sourced

Responsibly sourced paperboard cups allow brands to reduce their plastic use while maintaining the dependability and performance required for refrigerated dairy packaging and spreads.

- Our paperboard solution uses fiber from certified sources, ensuring that the fiber comes from responsible, renewable sources.
- Enhanced packaging options including FSC®-certified paperboard chain of custody options are available.
- A paper-based alternative to plastic containers, including plastic options that rely on secondary paper labels, support plastic-reduction initiatives.
- The containers are produced with at least 80% renewable materials.
